Global OE Partners

PS71

HS51

ECSTA PS71

A sports performance tire delivering true driving refinement. Provides fine and stable driving with superb handling and braking performance on wet and dry surfaces.

O1

4 WIDE GROOVE

SUV

Maximised tire contact area through an optimised tread design. 4 main wide grooves direct water drainage out of the tread area.

OPTIMISED BLOCK DESIGN

Improvement of dry road performance & high speed stability.

OPTIMUM SHAPE DRAWING RIB BY EACH

Upgrade of wet grip, wear out performance.

Harmony UHP

ECSTA HS51

Designed to balance performance and comfort with precision handling and braking combined with smoothness.

TIRE DESIGN

Improved braking in the wet and a centralised ribbed pattern design reinforces tread stiffness and stability.

WIDE LATERAL GROOVES

The 4 wide linear grooves maximises water displacement when turning.

CLOSED AND NOTCH SHOULDER

Handling performance has been improved due to the strengthened shoulder block.

High Performance

ECOWING ES31

Optimized technology for fuel efficiency & safety.

RR REDUCTION DESIGN

RR reduction through securing longitudinal strength with rib type center block.

BALANCED MIDDLE BLOCK

Improved wet performance by securing the side groove of inside part.

OPTIMAL WET PERFORMANCE

Optimized drainage performance and hydroplaning by wide 4 channel main groove.

High Performance

ECOWING KH27

Fuel economy and eco-friendly characteristics with great handling performance.

Sedan

BETTER WET GRIP & TRACTION PERFORMANCE

By a strengthened rib and improved center block.

LINE TYPE DIMPLE

Improvement of wet performance by line type dimple of driving direction.

UNIFORM SIPE/BLOCK

Improvement of wear out performance.

KUMHO TIRE GLOBAL DE BUSINESS / MAIN PRODUCT

KL33

CRUGEN Premium

A premium SUV tire offering high quality control and optimum handling in on-road conditions.

Premium Comfort

Optimum tread pitch design reduces road harmonics and provides better comfort performance.

01

DIFFERENCE PITCH DRAWING OF CENTER & SHOULDER BLOCK

Improvement of block stiffness and driving stablilty.

IMPROVED TRACTION PERFORMANCE

Semi-knurling and 3D tread block design results in improved snow and wet traction.
